## Grounds Mowing Contract Specifications 1 April 2025

The new Grounds Contract is to cover mowing only - mow all grassed areas indicated by the map. This includes the berm on Bridge Street and Harris Street entrance.

All areas around A, B, C, D, E, F and Administration blocks to be trimmed using a weed eater and paths edged.

The College estimate that a minimum of **26 cuts per year**, (fortnightly), should be allowed for.

It may be desirable to request an additional cut, if the state of grass is unacceptable and the College commit to providing reasonable notice for any such requests. For example, prior to open days or other College events.

This extra mowing should be quoted separately, in the tender:

- A whole school cut (playing fields, stop bank and all other grass areas) or
- Part of school only e.g. around buildings only.

### **Mechanical Plant, Labour and Materials**

- The Contractor will supply and maintain machinery as required to fulfil all aspects of the contract, includes all fuel.
- Any hand tools or other machinery required to be supplied by the Contractor.
- The Contractor will supply the level of labour and skills required to maintain the grounds to a high and acceptable standard.
- All materials required to complete all parts of this contract will be supplied by the Contractor.

### **Hours of Mowing**

- During school hours, (9 am – 3 pm), mowing of areas outside the internal boundary fence, (fields, front & rear berm), may be mowed.
- All internal areas may be mowed after 3 pm or at weekends, standard rates apply.

### **Additional notes:**

- The Board reserves the right to mow areas itself as required and if needed.
- All areas (except field) will include grass pick up.
- No grass against school buildings, walkways and fence lines.
- Green waste removal - two bags to be supplied by the Contractor & collected fortnightly.
- Any damage caused on school grounds must be reported within 24 hours.
- See school map to identify areas for ride on mowers and mowers with catchers.
